

## **North Carolina’s First Boatyard to have their Powerwashing Operations Permitted and in Environmental Compliance**

Specialty Boatworks, 262 Battleship Road, Bellville, NC is the first in the state to have its powerwashing operations brought onto environmental compliance and permitted by North Carolina Department of Natural and Environmental Resources Division of Water Quality.

Specialty Boatworks purchased a VANISH 300™ Marina Wastewater Recycle System from Clean Marine Solutions in July, 2010. Specialty Boatworks requested and received “Deemed Permitted” status per NC State Administrative Code 15A NCAC 02T.

“Deemed Permitted” status means that Specialty Boatworks did not have to go through the expensive full permitting process.

Using Clean Marine Solutions’ VANISH 300 and Closed-Loop Recycle Environmental Compliance Plan it only cost Specialty the price of a stamp to receive a permit. An environmental consulting company estimated that Specialty saved over \$8,000 by not having to go through the full recycle permitting process. Thousands of savings will continue to be realized at Specialty because compliance authorities waived the standard requirement that a licensed wastewater operator run the system. This is another key advantage of the VANISH 300 that sets it above the competition.

### **Do Not Purchase an Obsolete System**

The NC-DWQ reviewed our Closed-Loop Recycle Environmental Compliance Plan and made an on-site visit to Specialty. Their only concern was the possibility that power-wash overspray would drift onto the water and land.

We provided the NCDWQ with certified tests results of the metals in the effluent from the VANISH. The main metal of concern is copper. The tests indicate that our effluent has less copper than the EPA standard for drinking water. Deemed Permitted status was granted.

Clean Marine Solutions stands ready to help your facility become permitted with our affordable, simple to use system that will meet tough new compliance standards.

We can save you money in a multitude of ways. Contact us for a free consultation. Clean Marine Solutions stands ready to be your environmental compliance partner.

Note: Although Clean Marine Solutions guarantees that our Marina Wastewater Recycle System will not be the stumbling block in your facility receiving deemed permitted status from the NC-DWQ, it is the individual boatyard or marina that requests Deemed Permitted status for their whole recycling system and plan. The NC-DWQ requires an on-site visit to determine if a facility qualifies for deemed permitted status. The VANISH 300 is not in and of itself "deemed permitted." The state is prohibited from endorsing any system
